726 Minnesota Avenue  
Kansas City, KS 66101

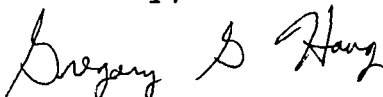

SUBJECT: Administrative Order on Consent Docket No. 88-F-0012

Dear Mr. Chen:

Enclosed is a work plan for the Phase II geophysical survey of the drainage ditch area immediately west of the Midcoast Aviation leased property at St. Louis International Airport. As per our phone conversation today the city has delayed concrete paving of the taxiway which crosses this drainage ditch until the magnetic survey is complete. The city would like to conduct this survey as soon as possible in order to make the determination whether paving can proceed or be further delayed because of potential buried drums. We would like to begin setting control for the survey as soon as possible so that the survey can be conducted early next week.

Your assistance in reviewing this information and providing comment will be appreciated. Thank you for assistance.

Sincerely,

Gregory G. Haug, P.E.  
Vice President
